RESTAURANT RECOMMENDER SYSTEM

A Project by Akshita Basera

Recommender system

Restaurant recommender system is a machine learning model, developed to demonstrate as a capstone project to IBM through coursera. It recommends restaurants based on the user's likes and dislikes and his previous interest data

1. Intro to Data

To find a solution to the questions and build a recommender model, we need data and lots of data.

→ Geographical coordinates

Find out where exactly it is located. (latitude and longitude)

→ Population

Population of the neighborhood where the restaurant is located.

→ Average income

Average income of the neighborhood to know how much the restaurant is worth.

Data

| Borough | | Neighborhoods | AverageIncome | Normalized_income | |
|---------|---------|-------------------|---------------|-------------------|--|
| 0 | Central | Cantonment area | 18944.099792 | 0.293051 | |
| 1 | Central | Domlur | 56837.022198 | 0.879225 | |
| 2 | Central | Indiranagar | 41991.817435 | 0.649581 | |
| 3 | Central | Jeevanbheemanagar | 6667,447632 | 0.103140 | |
| 4 | Central | Malleswaram | 53270.063892 | 0.824047 | |
| 4 | Central | Malleswaram | 53270.063892 | 0.82 | |

Income by neighborhood

| | Borough | Neighborhoods | Population | Normalized_population | | |
|---|---------|-------------------|------------|-----------------------|--|--|
| 0 | Central | Cantonment area | 866377 | 0.880810 | | |
| 1 | Central | Domlur | 743186 | 0.755567 | | |
| 2 | Central | Indiranagar | 474289 | 0.482190 | | |
| 3 | Central | Jeevanbheemanagar | 527874 | 0.536668 | | |
| 4 | Central | Malleswaram | 893629 | 0.908516 | | |
| | | | | | | |

| Borough | Neighborhoods | Latitude | Longitude | |
|---------|-------------------|-----------|-----------|--|
| Central | Cantonment area | 12.972442 | 77.580643 | |
| Central | Domlur | 12.960992 | 77.638726 | |
| Central | Indiranagar | 12.971891 | 77.641151 | |
| Central | Jeevanbheemanagar | 12.962900 | 77.659500 | |
| Central | Malleswaram | 13.003100 | 77.564300 | |
| Central | Pete area | 12.982700 | 77.575800 | |
| Central | Rajajinagar | 12.990100 | 77.552500 | |
| Central | Sadashivanagar | 13.006800 | 77.581300 | |
| Central | Seshadripuram | 12.993500 | 77.578700 | |
| Central | Shivajinagar | 12.985700 | 77.605700 | |

Neighborhood with coordinates

| | Neighborhood | Borough | Neighborhood Latitude | Neighborhood Longitude | Venue | Venue Latitude | Venue Longitude | Venue Category |
|---|-----------------|---------|-----------------------|------------------------|------------------|----------------|-----------------|--------------------|
| 0 | Cantonment area | Central | 12.972442 | 77.580643 | Hotel Fishland | 12.975569 | 77.578592 | Seafood Restaurant |
| 1 | Cantonment area | Central | 12.972442 | 77.580643 | Sapna Book House | 12.976355 | 77.578461 | Bookstore |
| 2 | Cantonment area | Central | 12.972442 | 77.580643 | Vasudev Adigas | 12.973707 | 77.579257 | Indian Restaurant |
| 3 | Cantonment area | Central | 12.972442 | 77.580643 | Adigas Hotel | 12.973554 | 77.579161 | Restaurant |
| 4 | Cantonment area | Central | 12.972442 | 77.580643 | Kamat Yatrinivas | 12.975985 | 77.578125 | Indian Restaurant |

Population by neighborhood

Foursquare API to fetch nearest venue locations

Exploratory analysis:

Finding K-mean value:

—

Inferential analysis:

- Most important factors while building the recommender system were population and income.
- They are the most important factor because they have a nonlinear relationship according to our dataset.

Result

The result of the recommender system is that it produces a list of top restaurants and the most common venue item that the user can enjoy. During the runtime of the model, a simulation was done by taking 'Domlur' as the neighborhood and then processed through our model so that it could recommend neighborhoods with similar characters as that of Domlur.

Conclusion and future directions

- → Built useful models to consider factors such as population, income and makes use of Foursquare API to determine nearby venues
- → It is a powerful data driven model whose efficiency may decrease with more data but accuracy will increase.
